

Enzyme and LeanIX sign a partnership agreement

Barcelona, 9th October 2014. LeanIX, the first provider of a modern and lightweight web-based platform for the management of application portfolios and Enzyme Advising Group, a Spain-based professional services firm with international presence, have signed a partnership agreement.

By joining the LeanIX partner network, Enzyme Advising Group will support its IT and Business consultancy projects with LeanIX's professional IT Portfolio Management solution. Customers will benefit from Enzyme's leading consultancy services combined with LeanIX's intuitive Enterprise Architecture Management software.

LeanIX and Enzyme Advising Group have already worked together in several projects, with customers from a wide range of industries, and where the joint approach has proven successful.

Enzyme Advising Group's consultancy projects can further benefit from a seamless integration of LeanIX and Signavio, a leading collaborative business process improvement platform provider. With both tools, Business and IT Alignment become a reality.

About LeanIX

LeanIX offers an innovative software-as-a-service solution for Enterprise Architecture Management (EAM), based either in a public cloud or the client's data center. The web-based platform has compelling advantages over traditional approaches, including an intuitive interface, flexible reporting and open APIs. This makes it possible to rapidly roll out LeanIX in an enterprise with minimal training required so as to start reaping added value within a short period of time. Both SMEs and large corporations from an array of industries are utilizing the solution – companies like Axel Springer, Helvetia, RWE, Vaillant and Trusted Shops. Businesses of all sizes are being acquired as customers, firms which used to be reluctant regarding EAM or had had frustrating experiences with cumbersome tools. LeanIX GmbH was formed in 2012 by Jörg G. Beyer and André Christ. With headquarters in Bonn, the company's large partner network extends throughout Europe and to Australia and the US. Additional information is available online at: www.leanix.net.
