

Enhance your Data Governance journey

Align Enterprise Architecture with Data Architecture with the combined power of LeanIX Enterprise Architecture Management (EAM) with Collibra Data Catalog.

EXECUTIVE SUMMARY

The availability of accurate, reliable data within an organization is key to making data-driven decisions. A lot of collaboration and integration efforts are required within the organizations to manage and maintain the increasing amount of data effectively. This leads to increased data silos and poor metadata quality that hampers effective data-driven strategy within organization.

This is where the out-of-the-box LeanIX - Collibra integrations provides the required support.

Combining Collibra and LeanIX enhances data governance within the organizations by ensuring that Enterprise Architecture is aligned with Data Architecture. It establishes transparency where the data is mastered, and how it flows through the IT landscape while eliminating data silos and improving metadata quality.

KEY BENEFITS FOR LEANIX CUSTOMER BASE

- ✓ **Increase transparency** to understand where data is mastered and how it flows through the IT landscape by syncing data between LeanIX and Collibra
- ✓ **Enable complete visibility into data ownership** and determine accountability through automated mapping of data owners from Collibra to LeanIX
- ✓ **Expand data accessibility** by eliminating data silos and leverage data across the enterprise while maintaining sound data governance

THE BUSINESS IMPACT

LeanIX EAM and Collibra Data Catalog integration enables effective data governance and empowers business leaders to make better data-driven decisions, improve operations support, reduce risk and enhance metadata quality.

“The LeanIX and Collibra data catalog integration is a small but essential building block in support of our data-driven strategy. It enables Migros to improve data usage as well as data governance. It also helps reduce the risks associated with data silos and supports value creation from our data for the enterprise architecture practice and the entire Migros Group.”

Martin Baschnagel, CTO / Group Chief Enterprise Architect
