Search architecture update: Continuous invest to up-level

Objective: Ensure scalability and performance of the LeanIX inventory search in the mid to long term

Decision: Investigate the migration to SAP HANA

- Could SAP HANA be used to host our search data?
- What are deployment options, developer experience, and multi-tenancy capabilities?

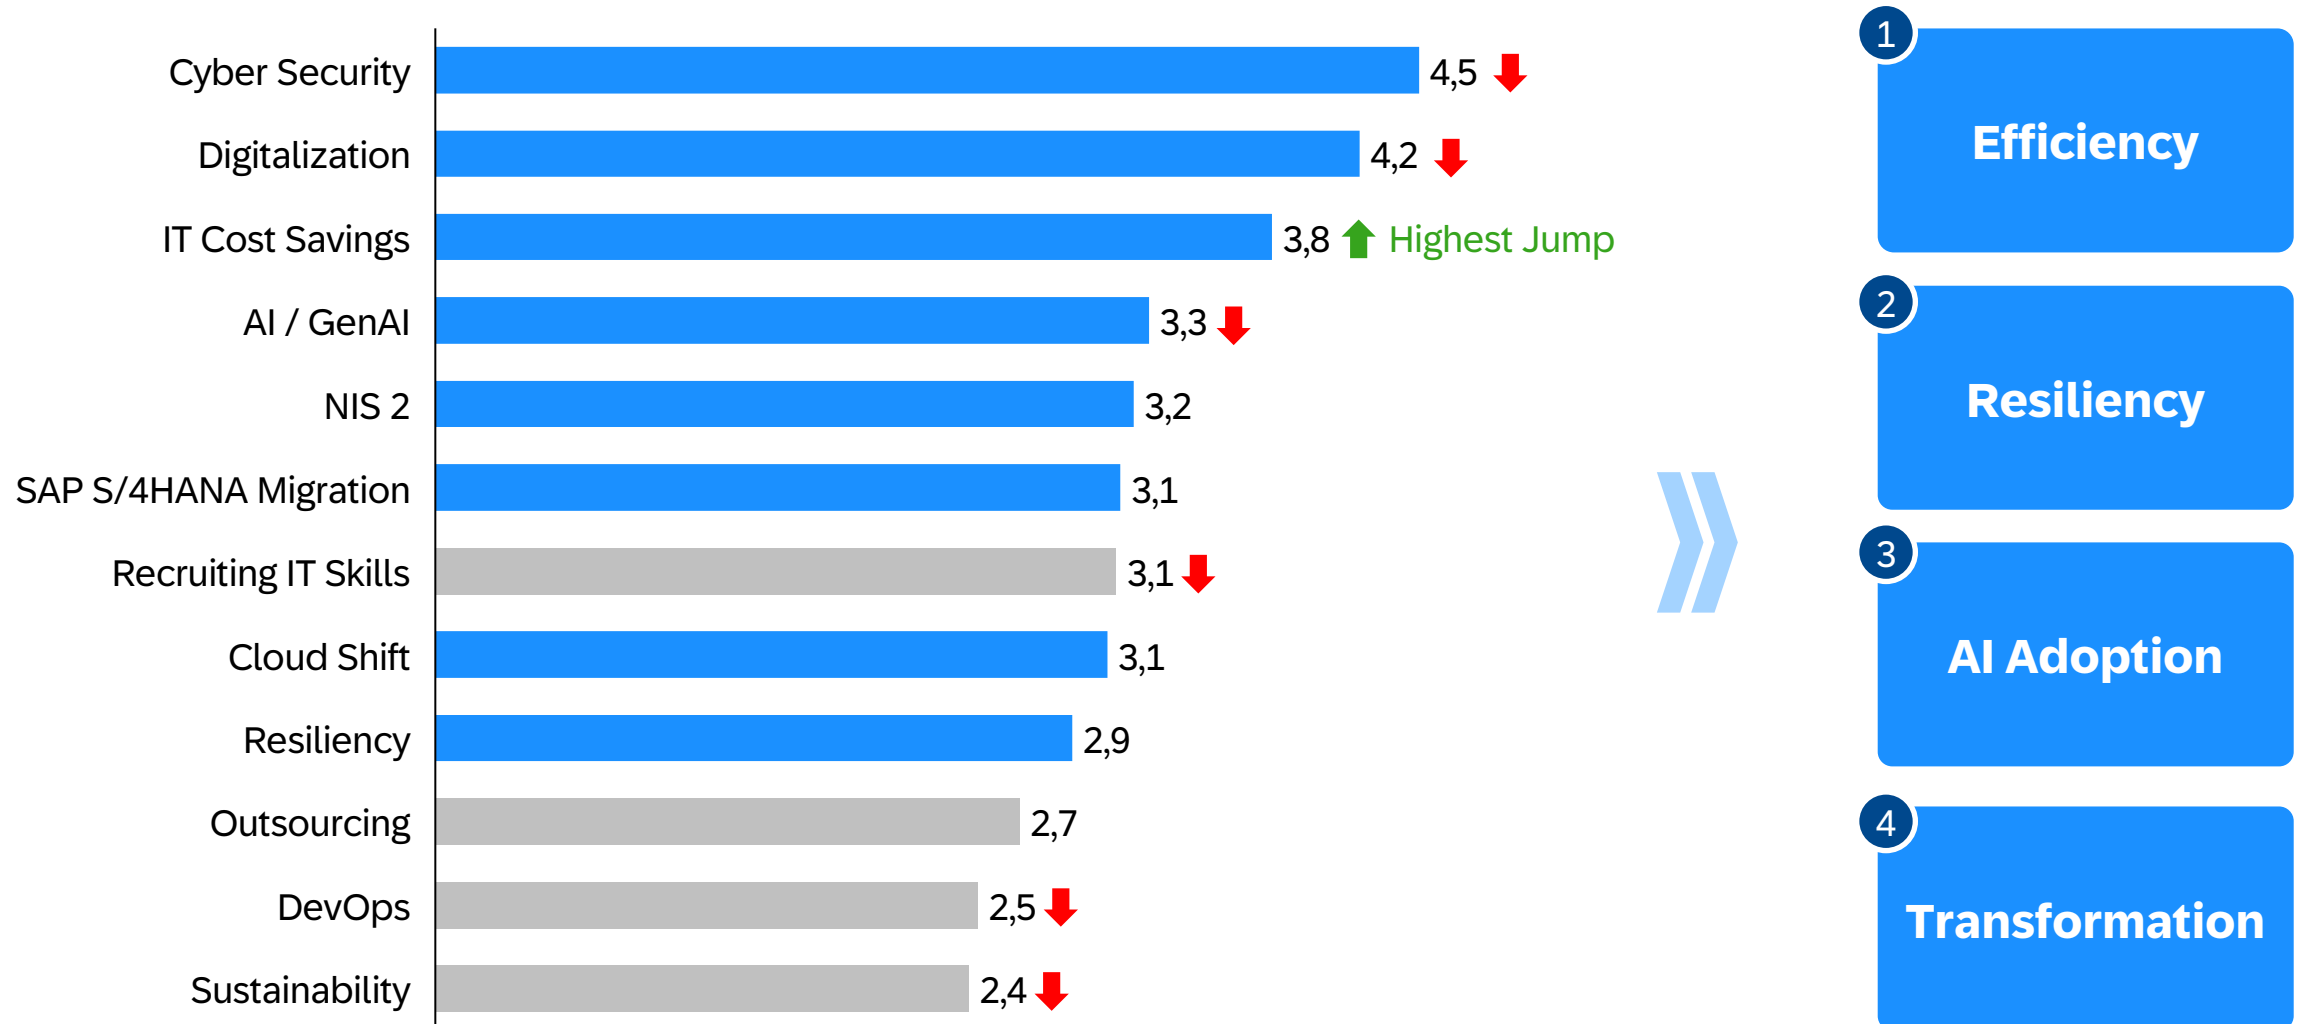

Potential customer benefits

- Enhanced speed in data search and retrieval, leading to faster query responses
- Ability to handle increased data volumes and user load
- Preparation for future requirements and anticipated data growth

Impact on roadmap: A decision to migrate to SAP HANA would impact other roadmap items related to the inventory, e.g., the implementation of an OR operator, a sort-by-any-column feature, or phrase search in full-text search.

Q2 Outlook

2025 Priorities of CIOs & IT leaders – 4 major objectives

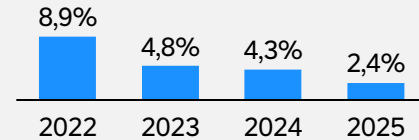

Enterprise Architecture (EA) is critical for success

1

Efficiency

IT Budget growth decreasing

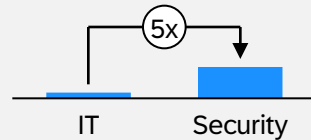

Enterprise Architecture (EA) contribution

Rationalize application and process complexity to redirect resources into innovation

2

Resiliency

Security budgets growing fast

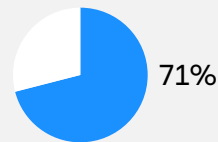

Standardize technology sprawl to mitigate vulnerabilities and ensure compliance

3

AI Adoption

Data is biggest challenge for AI

Integrate distributed systems and data sources to provide high-quality data at scale

4

Transformation

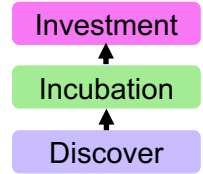

Large # of companies on legacy ERP

30k+

Companies live on SAP ECC

Modernize monolithic, on-prem ERP system to modular & integrated cloud business suite

Tangible LeanIX use cases help EAs to create impact

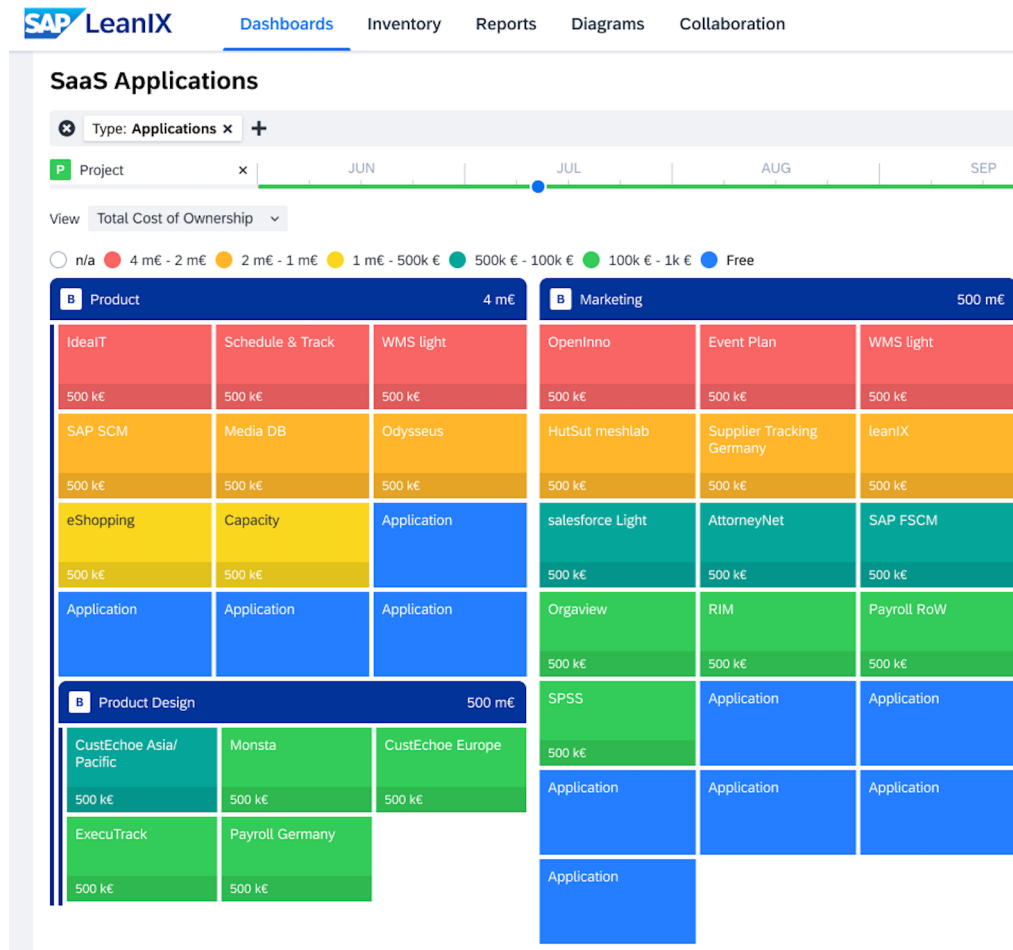

CIO Priorities

Mature LeanIX use cases

Emerging use cases*

Efficiency	- Application Rationalization - Post Merger IT Integration & Carve Out (Q1) Investment		- Application TCO Reduction Incubation - Value Realization on IT Roadmap Discovery
Resiliency	Obsolescence Risk Management		- Automated product architecture & Software Bill of Materials (SBOM) Incubation - Digital Operational Resiliency Act (DORA) Discovery
AI Adoption	AI Adoption & Governance		Data Architecture for AI & Business Data Cloud ("SAP AI First") Discovery
Transformation	- Application Modernization - ERP Transformation Investment		- Decompose Monolith to Business Suite ("Integrated Toolchain") Incubation - Strategic IT Skill planning (with SuccessFactors) Discovery

Application TCO Reduction (First insights)

This use case enables companies to **merge insights from EA & IT cost management**, steering IT more holistically that **aligns with strategic objectives & facilitates data-driven decisions** regarding app rationalization.

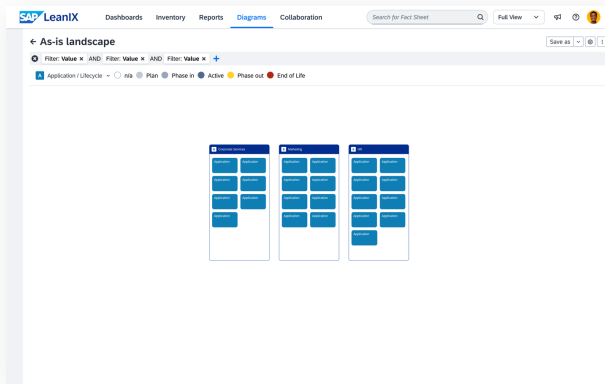

- **Simplified Meta Model**
Lowering the hurdles to (bulk-) import cost-related data
- **Flexible Calculations**
Using the new code execution functionality to easily aggregate different TCO ingredients
- **Fine-tuned Reports**
Offering a native representation of costs in our standard reports
- **Inclusion in the Executive Dashboard**
Allowing a cost-driven steering including historization

Target architecture planning

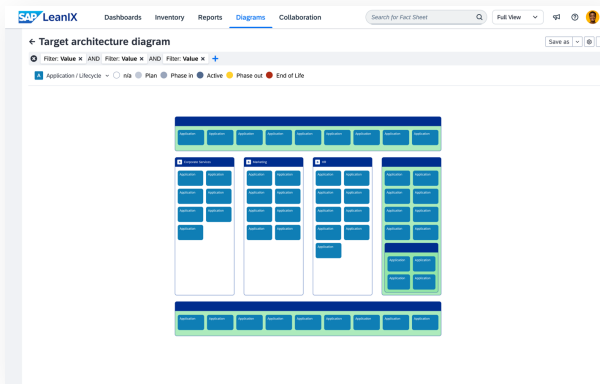

As-is landscape

Target architecture

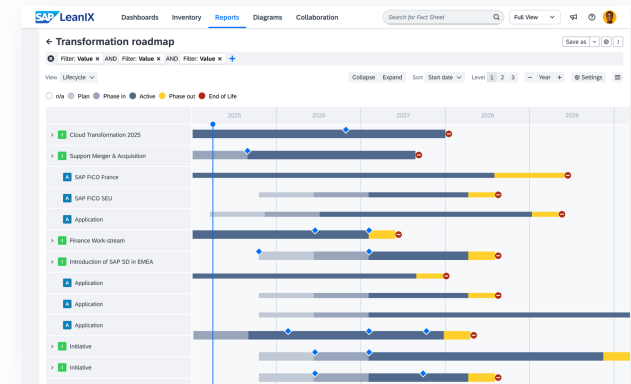

Transformation Roadmap

Start from a diagram capturing the as-is landscape.

Map out the target architecture leveraging the diagrams capability.

Derive transformations and translate into plans.

Simplified and guided creation of transformations, by translating target architecture diagrams intuitively into transformations and well-crafted plans.

Q2/2025: Selected roadmap highlights

Deep dive following

Trusted Inventory

- Natural language search for filter generation
-  WalkMe discovery
- Data quality recommendations
-  SAP system discovery

Architecture Insights

- Drill-down on landscape report

Architecture Recommendations

- Executive dashboard
- AI-based architecture guidance
- Further mature Architecture decisions

Guided Transformations

- Unified Jira integration
- Export / import transformations

Visit roadmap.leanix.net to see all roadmap items

Q2/2025 Highlight: Natural language search for filter generation

The screenshot shows the SAP LeanIX Inventory page. The top navigation bar includes 'Dashboards', 'Inventory' (selected), 'Reports', 'Diagrams', and 'Collaboration'. A search bar contains 'Search for Fact Sheet'. The left sidebar shows 'Filters' with sections for 'TYPE' (Application, 132), 'BUSINESS CAPABILITIES' (Customer Relationship, HR, Finance, Information Technology, Marketing, Empty (on purpose), n/a), and 'ORGANIZATIONS' (Australia, Spain, Headquarter). The main content area shows a search for 'show me apps with broken quality seal' with filters 'Type: Application' and 'Quality Seal: Broken'. It displays 40 of 132 results, sorted alphabetically. The results list includes Adobe Creative Cloud, Adobe Creative Cloud / Adobe Acrobat Pro, Adobe Creative Cloud / Adobe Illustrator, Adobe Creative Cloud / Adobe InDesign, and Adobe Creative Cloud / Adobe Photoshop, each with a description, completion status, and date.

Customer benefits

- Simplify filtering: Just type what you need
- Broader adoption: Makes filtering accessible to both technical and non-technical users
- Time savings: Reduce manual work and quickly access relevant data

Strategic value

- Commoditizing Enterprise Architecture by making it accessible to infrequent users

Q2/2025 Highlight: SAP system discovery 1/2

Applications

Which applications support my business?

- 1-2 levels, depending on ownership, business capabilities, lifecycle, ...

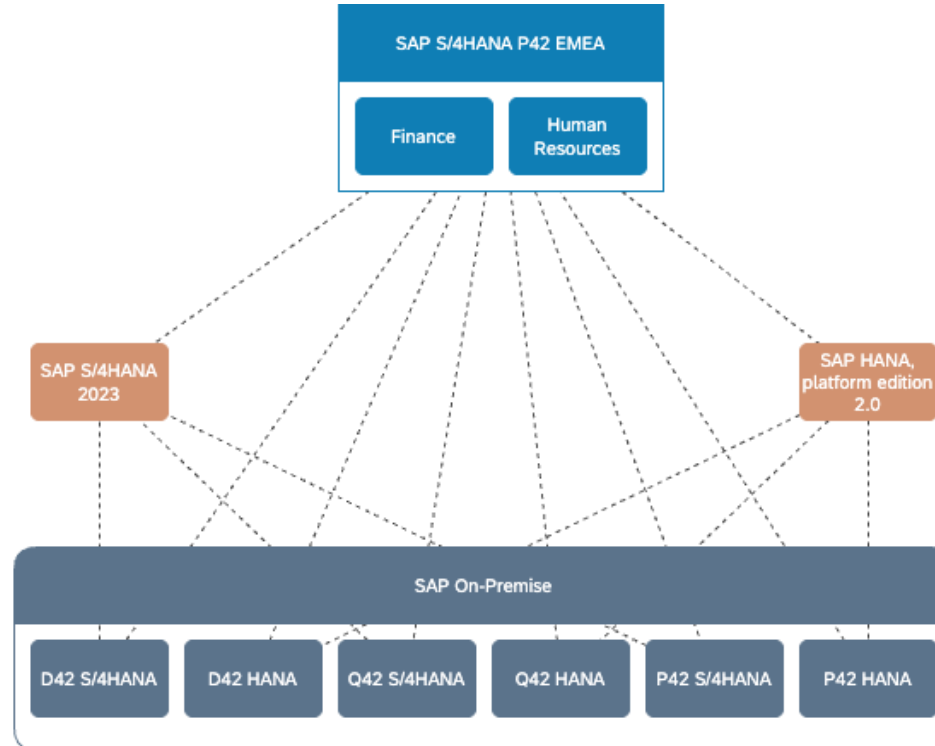

IT Components

Which technology is used by my applications and running on the systems?

Systems

What are the systems underneath the application?

- Sub-type: SAP
- L1 surfaces deployment type: SAP On-Premise, SAP Private Cloud, SAP Public Cloud
- Attributes: SID, Role (Prod/Dev/Test), System Number, Customer Name, ...

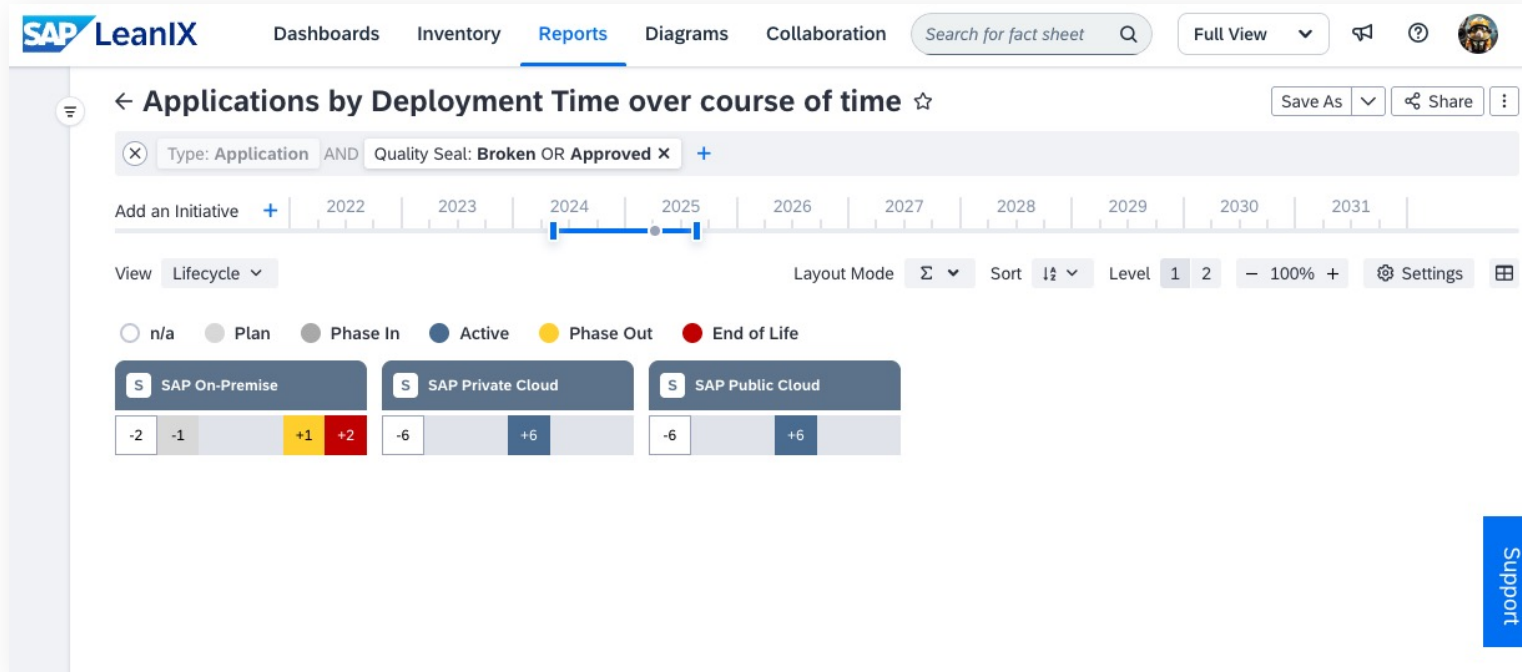

Customer benefits

- Capture the SAP systems as fact sheets to track ownership and their relation to applications (including prod & non-prod systems)
- Use system-level data (e.g., system number) to navigate your inventory

Strategic value

- Maintain an updated application inventory through automated, continuous discovery
- Bring your SAP teams into SAP LeanIX

Q2/2025 Highlight: SAP system discovery 2/2

Customer benefits

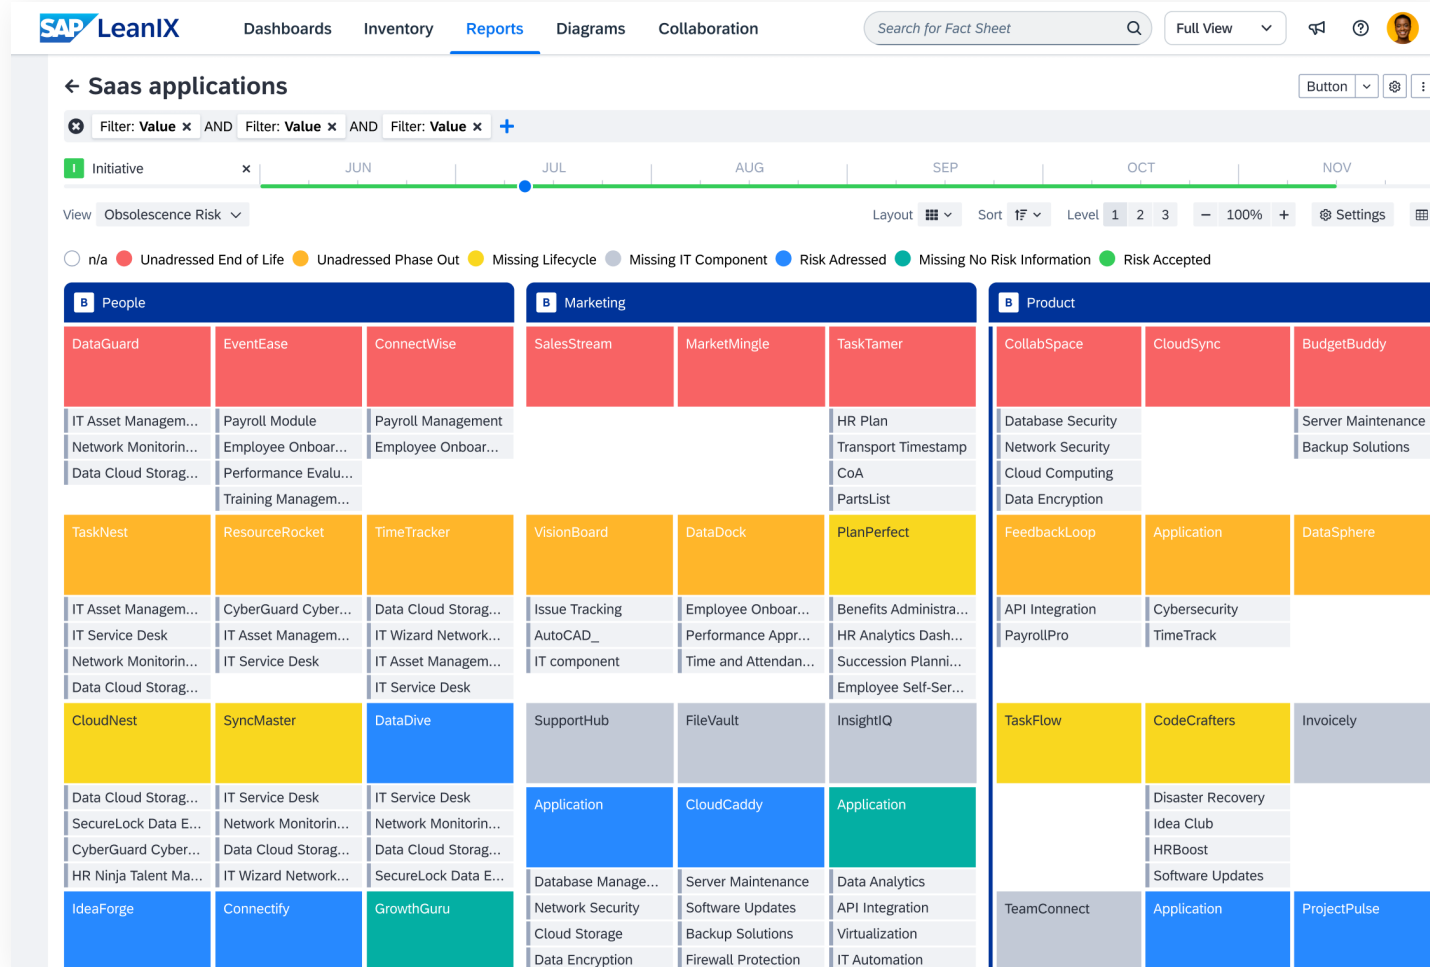

- Leverage systems in reports and diagrams

Strategic value

- Easily understand the deployment for your SAP-based applications across SAP on-premise, SAP private cloud and SAP public cloud

Q2/2025 Highlight: Drill-down on landscape report

Feature release
planned in Q3

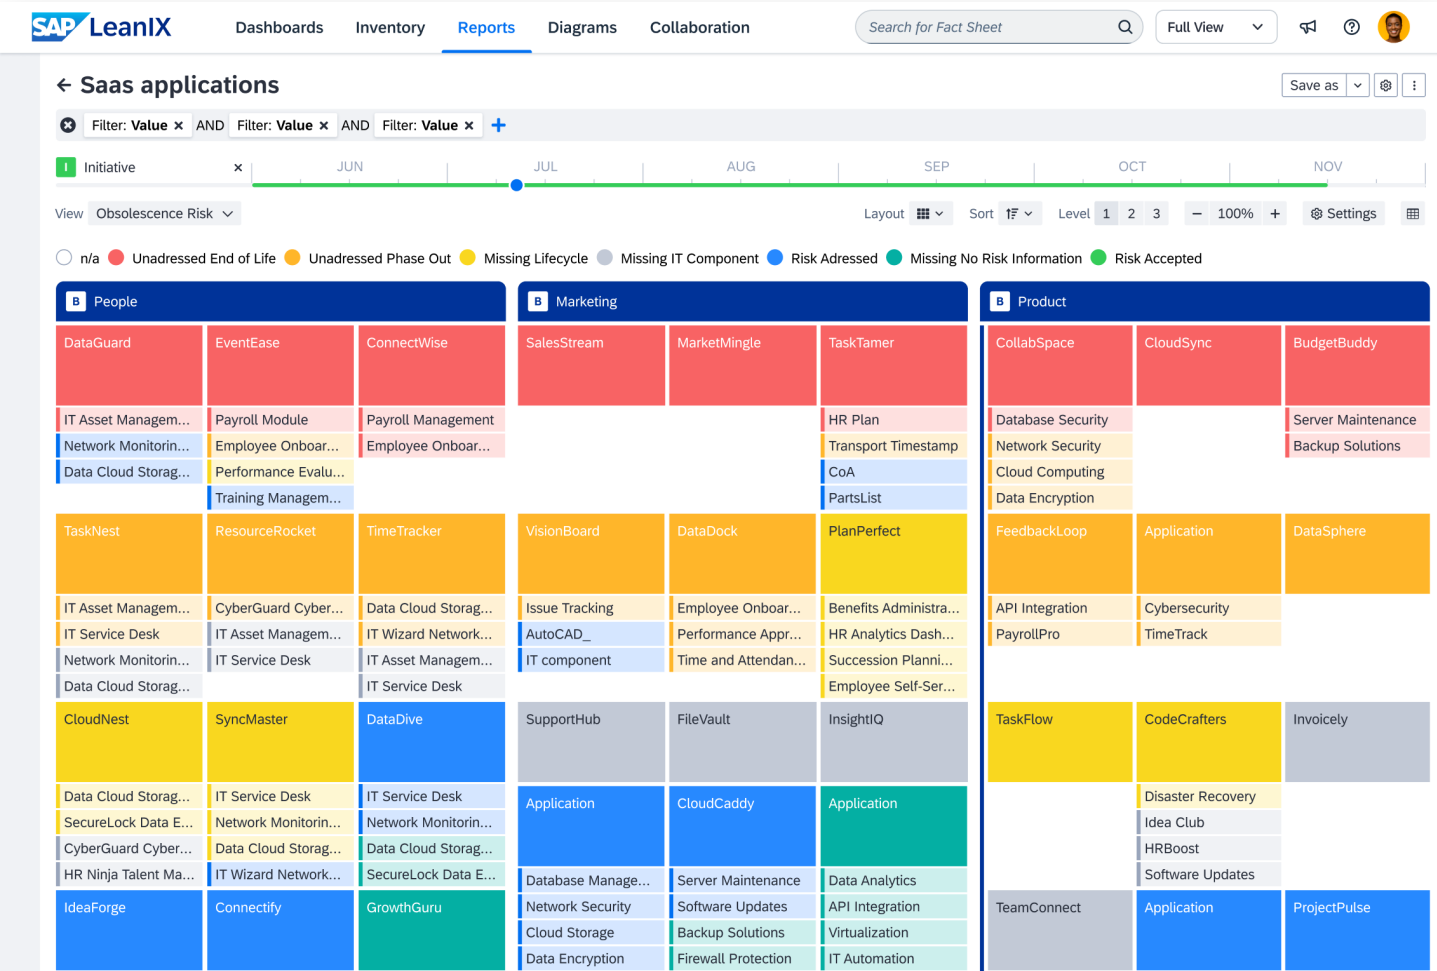

Customer benefits

- Adding an extra dimension of insights to the landscape report
- Easy to comprehend for occasional users
- Available for detailed and stacked layout
- Consolidate tasks in fewer reports

Q2/2025 Highlight: Drill-down on landscape report

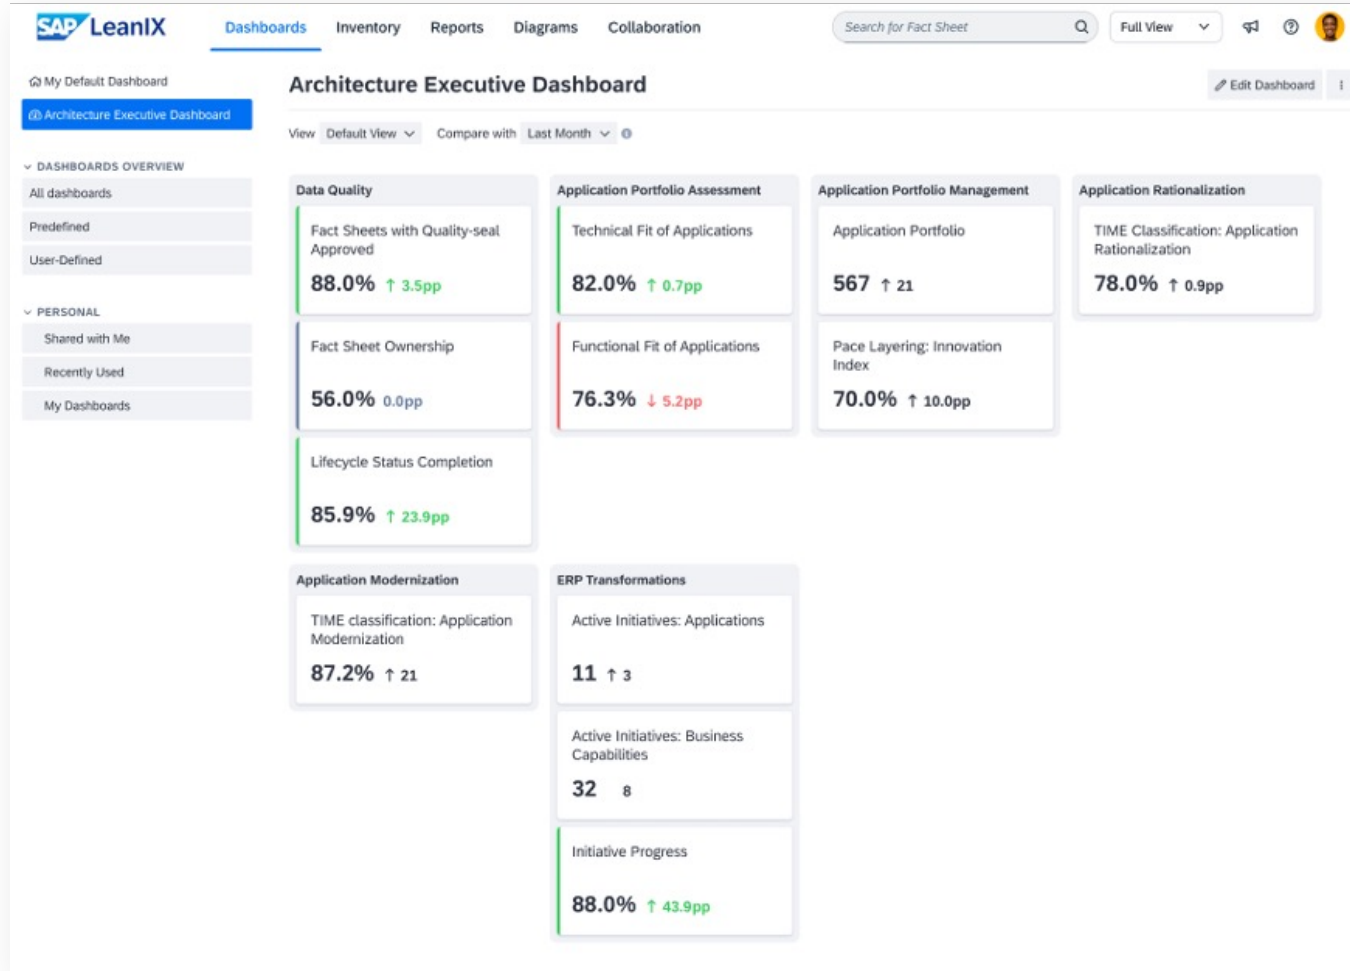

Feature release
planned in Q3

Drill-Down use cases

- Obsolescence risk
- DORA compliance
- App rationalization
- Project dependency & value analysis
- Many more

Q2/2025 Highlight: Executive dashboard

Customer benefits

- Save time on manual reporting with an intuitive, executive-ready dashboard
- Simplify reporting by using a comprehensive set of pre-defined KPIs
- Offer direct access to real-time transformation KPIs, ensuring timely insights

Strategic value

- Empower executives with immediate insights and actionable data, enabling informed decision-making

Q2/2025 Highlight: AI-based architecture guidance

Feature release
planned for 2025

The screenshot displays the SAP LeanIX user interface. At the top, there is a navigation bar with links for Dashboards, Inventory, Reports, Diagrams, and More. A search bar labeled 'Search for Fact Sheet' and a 'Full view' dropdown are also present. The main content area is titled 'Insights' and features a sidebar on the left with two cards: '8 Applications Identified for Potential Rationalisation' and 'Potential Vendor Local Identified'. The main card on the right is titled '8 Applications Identified for Potential Rationalisation' and includes a sub-header 'Overview' and 'Affected Fact Sheets'. It contains a description of the Gartner® TIME analysis, a 'Creation Date' of 23/02/2025, and a 'Recommendations' section with three actionable items: 'Send survey to app owners to confirm predicted functional and technical fit' (marked as 'Completed'), 'Review the identified applications and decide on how to proceed with them' (with 'Open Report' and 'Create Decision' buttons), and 'Start the process to remove identified applications from your workspace' (with a 'Create Roadmap' button).

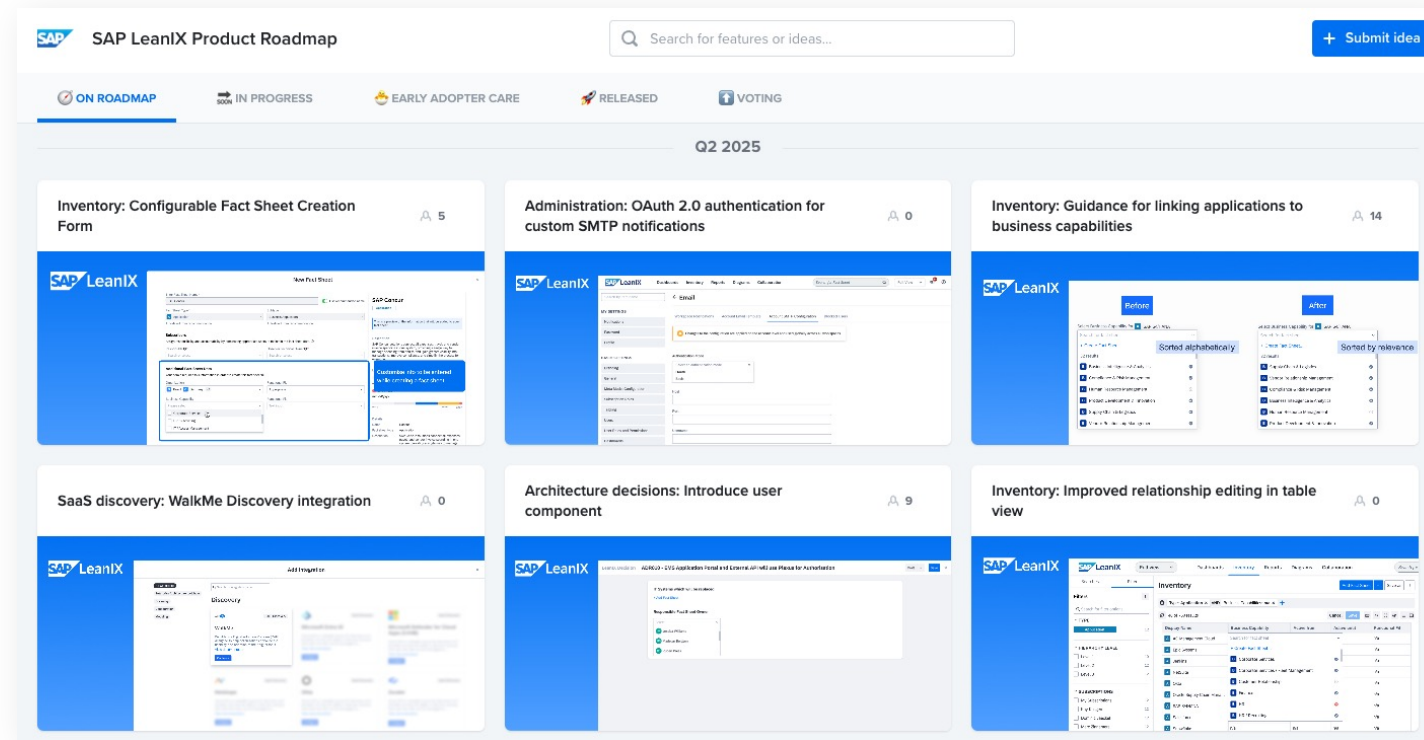

Customer benefits

- Insightful and actionable architecture improvements for your workspace
- Data gaps are filled by tailored AI
- Tailored action plan with concrete steps make improvements simple

Strategic value

- Enhanced efficiency of EA function
- Save valuable time by focusing only on the most important action points

Q2 2025 roadmap is live on roadmap.leanix.net

- Browse all updated roadmap items
- Keep submitting your feedback and new ideas
- Explore existing and some new voting items

Event highlights in your region

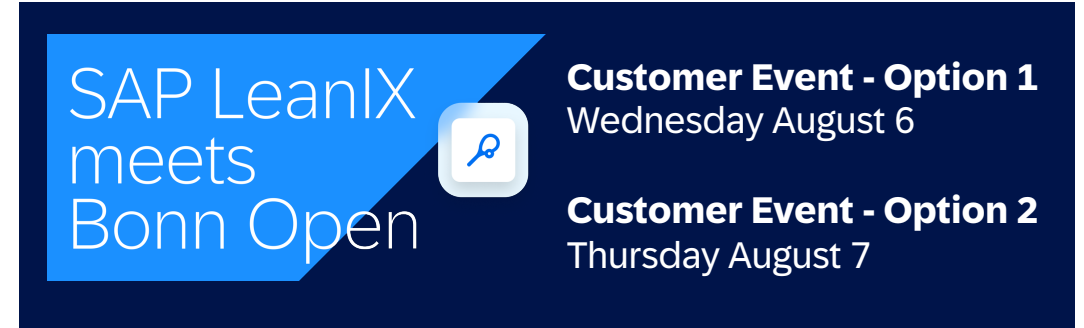

SAP Transformation Excellence Summit in Austin
SEPTEMBER 15-17, 2025 | FAIRMONT AUSTIN, TEXAS

Designed for EA leaders like yourself, this invaluable event will explore the vital role enterprise architects play in driving holistic business transformation. Come discover the enterprise architecture tools and strategies you need to make transformation a business capability.
